Ten Years National Anthropological Museum: Review

Atanas Katsarov*, Diana Zlatkova, Maria Christova

Institute of Experimental Morphology, Pathology and Anthropology with Museum, Bulgarian Academy of Sciences, Sofia, Bulgaria

National Anthropological Museum is a scientific, educational and cultural institution that presented anthropological studies of the Bulgarian population and the people who inhabited the Bulgarian lands in the past. These results known to a limited circle of specialists were not available to the general public. The creation of the permanent exhibition and the subsequent opening of the National Anthropological Museum on March 21 2007, contributing to the promotion of anthropological knowledge. Amid the data for the historic and cultural development and religious beliefs in different eras are presented physical types of people, knowledge about illnesses and injuries that have left marks on the bones, and medical and ritual influence on them. The museum is the youngest in the structure of BAS and it is an integral part of the Institute of Experimental Morphology, Pathology and Anthropology.
